Data Source: Maine Hospital Inpatient and Outpatient Databases; Maine Health Data Organization.

Traumatic brain injury emergency department visits are defined as emergency department visits by Maine residents at non-rehabilitation/psychiatric hospitals for which the principal and/or one of the secondary diagnoses is coded as ICD-9-CM code 800.0-801.9, 803.0-804.9, 850.0-850.9, 851.0-854.1, 950.1-950.3, 959.01, or 995.55, and either the principal diagnosis was an injury or an external cause of injury was reported.

Crude rates are emergency department visits per 100,000 population.

Age-adjusted rates are emergency department visits per 100,000 population age-adjusted to the U.S. 2000 standard population.

95% CI: 95% confidence interval of the rate.

NApp= Not applicable. Age-adjusted rates are not calculated for specific age groups.
